Numpy Indexing and Selection

Now you will be given a few matrices, and be asked to replicate the resulting matrix outputs:

```
In [37]: mat = np.arange(1,26).reshape(5,5)
mat
```

```
Out[37]: array([[ 1,  2,  3,  4,  5],
                [ 6,  7,  8,  9, 10],
                [11, 12, 13, 14, 15],
                [16, 17, 18, 19, 20],
                [21, 22, 23, 24, 25]])
```

```
In [0]: # WRITE CODE HERE THAT REPRODUCES THE OUTPUT OF THE CELL BELOW  
# BE CAREFUL NOT TO RUN THE CELL BELOW, OTHERWISE YOU WON'T  
# BE ABLE TO SEE THE OUTPUT ANY MORE
```

```
In [38]: mat[2:5,1:5]
```

```
Out[38]: array([[12, 13, 14, 15],  
               [17, 18, 19, 20],  
               [22, 23, 24, 25]])
```

```
In [0]: # WRITE CODE HERE THAT REPRODUCES THE OUTPUT OF THE CELL BELOW  
# BE CAREFUL NOT TO RUN THE CELL BELOW, OTHERWISE YOU WON'T  
# BE ABLE TO SEE THE OUTPUT ANY MORE
```

```
In [43]: a=mat[3:4,0:5].max()  
a
```

```
Out[43]: 20
```

```
In [0]: # WRITE CODE HERE THAT REPRODUCES THE OUTPUT OF THE CELL BELOW  
# BE CAREFUL NOT TO RUN THE CELL BELOW, OTHERWISE YOU WON'T  
# BE ABLE TO SEE THE OUTPUT ANY MORE
```

```
In [45]: mat[0:3,1:2]
```

```
Out[45]: array([[ 2],  
               [ 7],  
               [12]])
```

```
In [0]: # WRITE CODE HERE THAT REPRODUCES THE OUTPUT OF THE CELL BELOW  
# BE CAREFUL NOT TO RUN THE CELL BELOW, OTHERWISE YOU WON'T  
# BE ABLE TO SEE THE OUTPUT ANY MORE
```

```
In [49]: mat[4:5,0:5].reshape(5)
```

```
Out[49]: array([21, 22, 23, 24, 25])
```

```
In [0]: # WRITE CODE HERE THAT REPRODUCES THE OUTPUT OF THE CELL BELOW  
# BE CAREFUL NOT TO RUN THE CELL BELOW, OTHERWISE YOU WON'T  
# BE ABLE TO SEE THE OUTPUT ANY MORE
```

```
In [50]: mat[3:,0:]
```

```
Out[50]: array([[16, 17, 18, 19, 20],  
               [21, 22, 23, 24, 25]])
```

Now do the following

Get the sum of all the values in mat

```
In [51]: mat.sum()
```

```
Out[51]: 325
```

Get the standard deviation of the values in mat

```
In [52]: mat.std()
```

```
Out[52]: 7.211102550927978
```

Get the sum of all the columns in mat

```
In [55]: mat.sum(axis=0)
```

```
Out[55]: array([55, 60, 65, 70, 75])
```
